VigiFlow release 28 June 2022

What's new?

District information
Fields for District have been added in the following places in the data entry forms:

AEFI form

- Patient
- Reporter details
- Reporter address book
- Health facility (place or vaccination centre)
- Health facility address book

ICSR form

- Initial reporter information
- Reporter address book

Excel and PDF outputs
Some District fields are also provided in the Excel and PDF outputs:

- Reporter district
    - in Excel report
    - in Unmasked PDF
    - in Masked PDF (as MSK)
- Health facility district
    - in AEFI Excel

XML imports and exports
An extended field named *Patient's County (district)* has been added to **E2B R3** and VigiFlow can receive information and export information using it.

What's improved?
Some performance enhancements and small bug fixes have been made.
